860/15 Soi Pracha Chuen 28, Wong Sawang, Bang Sue, Bangkok, 10800

Chemical Engineering graduated with experience in manufacturing and process validation. Skilled in data analysis, problem-solving, and cross-functional collaboration, with a strong interest in ensuring data accuracy and integrity.

EXPERIENCES

Reckitt Benckiser (Durex) (1 year contract)

(Dec2025-Mar2026)

Process Technologist

- Executed OQ/PQ process validation in GMP-regulated medical device manufacturing, conducting trials and collecting accurate data to determine optimal machine conditions. Led UDI laser printing validation across 5 machines and supported ET leakage testing across 12 new machines gaining hands-on experience in data accuracy, problem-solving, and process improvement.
- Identified, reported, and troubleshoot production issues in collaboration with the manager and cross-functional teams, ensuring accurate information was communicated and supporting smooth operations and successful validation.

Work and Travel Program at Livingston, Montana, USA

(May2025-Sep2025)

- Gained international work experience while improving English communication through daily interactions with native speakers and adapting to a multicultural environment for 4 months.

Cirprise (Startup Company)

(Feb2025-Apr2025)

Research & Development - Internship

- Designed and developed an innovative powdered hand soap formulation that reduced carbon footprint by up to 95% compared with the original product through reformulation of ingredients, while coordinating the patent process. Conducted formulation trials to optimize product quality and cost efficiency, strengthening skills in experimental design, data analysis, and problem solving.

Mektec Manufacturing Corporation (Thailand) Ltd.

(May2024-July2024)

Facilities Engineer (Waste&Chemical) - Internship

- Calculated the organization's carbon footprint (Scope 1 and Scope 3) using real plant data, collaborating with cross-functional teams for data collection and chemical preparation while strengthening large dataset management and analytical skills
- Analyzed heavy metal contamination in wastewater to support sustainability and waste management initiatives, gaining hands-on experience in environmental monitoring and data analysis

EDUCATION

Chulalongkorn University

Bachelor of Engineering – Chemical Engineering

Bangkok, TH

Graduated: May 2025

PROJECTS

Methanol production plant from CO₂ using alcohol-assisted conversion design

Designed a methanol production plant from CO₂ using alcohol-assisted conversion, covering process design, simulation, equipment selection, and plant layout, achieving methanol purity above 98% to meet market-grade product specifications. Conducted economic evaluation to assess project feasibility and cost efficiency, strengthening technical skills in process modeling and plant design.

Upcycling Processed/Waste Plastic into High-Efficiency Air Filters

Developed a concept to upcycle processed plastic waste into high efficiency air filters using electrospinning, enhancing fine particle filtration performance while promoting sustainable waste management with potential to serve as a scalable future model for industrial waste reduction and circular resource utilization.

LEADERSHIP AND ACHIEVEMENTS (SELECTED)

Chem Eng Night 2024 (Department alumni reunion event)

(Feb2025-Apr2025)

Head of location and registration team

- Led a team to coordinate with the university's central office to arrange the venue, planned event layout and seating, and consulted with vendors for catering and logistics.
- Managed team responsibilities and provided progress updates to faculty advisors, strengthening leadership, stakeholder communication, and event coordination skills.

The members of "Young Sustainability Practitioner #4"

(Sep2024-Nov2024)

- Completed a sustainability focused program covering climate change, resource management, and carbon footprint assessment.
- Collaborated with a team to develop a sustainability solution addressing agricultural challenges and presented the idea as the team representative, which was voted the winning concept. Strengthened skills in teamwork, presentation, and problem-solving under time constraints.

Volunteer and Educational Camp

(2021-2025)

- Participated in several volunteer and educational camps in rural communities, gaining exposure to diverse living conditions and community challenges. Engaged with residents to understand their needs and perspectives while collaborating with colleagues from others major, strengthening empathy, sense of humor, and cross-cultural communication.
- The winner of "2023 Rakkaew Foundation National: University Sustainability showcase"

SKILLS AND INTERESTS

- Language: Thai (Native), English (Upper Intermediate) (Toeic Score 735)
- Skill: Microsoft office (Excel, Word, PowerPoint), Minitab, Python, Matlab, Aspen plus, SimaPro, and AutodeskFusion360
